MATERIAL SAFETY DATA SHEET

SECTION 1 - IDENTIFICATION

Product identifier: COUGAR 120 EC Herbicide
Product Code(s): 48B/4955
Product Use: Herbicide
Chemical Family: Aryloxyphenoxypropionic pesticide Mixture.
Supplier's name and address:
Cheminova Canada Inc.
22499 Jefferies Road, Unit C2
Kilworth, ON, Canada N0L 1R0
Information Telephone # 1-888-316-6260 (Monday - Friday, 8:00 AM - 4:00 PM, Eastern Standard Time)
24 Hr. Emergency Tel # (613) 996-6666 (CANUTEC)
Other names: FENOXAPROP-P-ETHYL 120 g/L EC

Manufacturer’s name and address:
Cheminova A/S
PO Box 9
DK-7620 Lemvig, Denmark

SECTION 2 - HAZARDS IDENTIFICATION

Classification
OSHA: This material is classified as hazardous under OSHA regulations (29CFR 1910.1200).
Hazardous classification: Acute Health Hazard; Chronic Health Hazard
Whmis information: This product is a Pest Control Product and is not regulated as a Controlled Product under the Hazardous Products Act (HPA).
For informational purposes, this product would have the following WHMIS classification: Class D2B (Materials Causing Other Toxic Effects, Toxic Material)

Emergency Overview
Yellow aromatic liquid.
DANGER! Risk of serious damage to eyes. Harmful by inhalation and in contact with skin. Harmful if swallowed. Irritating to eyes. Irritating to skin. May cause sensitization by skin contact. Harmful: may cause lung damage if swallowed. Prolonged or repeated exposure may cause skin irritation. Very toxic to aquatic life with long lasting effects.

POTENTIAL HEALTH EFFECTS:

Signs and symptoms of short-term (acute) exposure

Inhalation
Inhalation of dust may cause shortness of breath, tightness of the chest, a sore throat and cough. May cause irritation of respiratory tract.

Skin
May cause skin irritation and/or dermatitis.

Eyes
Severe irritation, burns and possibly permanent eye damage may result from direct contact.

Ingestion
Harmful if swallowed. May cause irritation of mouth, throat, and stomach. Symptoms may include pain, headache, nausea, vomiting, dizziness, drowsiness and other central nervous system effects. Aspiration may cause pulmonary oedema and pneumonitis. Aspiration can result in life-threatening lung injury.

Effects of long-term (chronic) exposure
None known or reported by the manufacturer.

Carcinogenic status
See TOXICOLOGICAL INFORMATION,

Additional health hazards
See TOXICOLOGICAL INFORMATION, Section 11. Possible sensitizer.

Potential environmental effects
Harmful to aquatic organisms, may cause long-term adverse effects in the aquatic environment. See ECOLOGICAL INFORMATION, Section 12.

SECTION 4 - FIRST AID MEASURES

Inhalation: Immediately remove person to fresh air. If breathing is difficult, give oxygen by qualified medical personnel only. If breathing has stopped, give artificial respiration. Seek immediate medical attention/advice.

Skin contact: Wash off immediately with soap and plenty of water while removing all contaminated clothes and shoes. If irritation persists, seek prompt medical attention. Wash contaminated clothing before re-use.

Eye contact: Flush immediately with large amounts of water for at least 15 minutes, occasionally lifting the upper and lower eyelids. After initial flushing, remove any contact lenses if worn, and continue flushing for at least 5 to 10 minutes. If irritation persists, seek prompt medical attention.

Ingestion: Do NOT induce vomiting. Have victim rinse mouth with water, then give one to two glasses of water to drink. Never give anything by mouth to an unconscious person. If vomiting occurs, have victim rinse mouth again. Seek immediate medical attention/advice.

Notes for Physician: Treat symptomatically. Gastric lavage or administration of activated charcoal can be considered.

SECTION 5 - FIRE FIGHTING MEASURES

Fire hazards/conditions of flammability: Not flammable under normal conditions of use. However, may ignite if exposed to extreme heat and flame. Closed containers may rupture if exposed to excess heat or flame due to a build-up of internal pressure.

Flammability classification (OSHA 29 CFR 1910.1200): Combustible Liquid Class III B.

Oxidizing properties: None

Explosion data: Sensitivity to mechanical impact / static discharge: Sensitive to static discharge. Not sensitive to mechanical impact.

Suitable extinguishing media: Dry chemical, foam, carbon dioxide and water fog. Use water spray to cool unopened containers.

Special fire-fighting procedures/equipment: Firefighters should wear proper protective equipment and self-contained breathing apparatus with full face piece operated in positive pressure mode. Move containers from fire area if safe to do so. Water spray may be useful in cooling equipment exposed to heat and flame. Avoid spreading burning solid with water spray used for cooling purposes. Approach the fire from upwind to avoid hazardous vapours and toxic decomposition products.

Hazardous combustion products: Decomposition products include: carbon monoxide, carbon dioxide, nitrogen oxides, hydrogen chloride and various organic chlorinated compounds.
MATERIAL SAFETY DATA SHEET

NFPA Rating

0 - Minimal  1 - Slight  2 - Moderate  3 - Serious  4 - Severe

Health: 1  Flammability: 1  Instability: 0  Special Hazards: --

SECTION 6 - ACCIDENTAL RELEASE MEASURES

Personal precautions

Restrict access to area until completion of clean-up. All persons dealing with clean-up should wear the appropriate protective equipment including self-contained breathing apparatus. Refer to Section 8, EXPOSURE CONTROLS AND PERSONAL PROTECTION, for additional information on acceptable personal protective equipment.

Environmental precautions

Ensure spilled product does not enter drains, sewers, waterways, or confined spaces. If necessary, dike well ahead of the spill to prevent runoff into drains, sewers, or any natural waterway or drinking supply.

Spill response/cleanup

Remove all sources of ignition. Ventilate area of release. Stop the spill at source if it is safe to do so. Absorb material with inert absorbent, and place into labelled containers for disposal. Avoid dust cloud formation. Rinse area with detergent and much water. Absorb wash liquid with an absorbent such as hydrated lime, fuller's earth or other clays. Contaminated water should be sent for treatment and disposal.

Prohibited materials

None known.

Special spill response procedures

In case of a transportation accident, in the United States contact CHEMTREC at 1-800-424-9300 or International at 1-703-527-3887.

SECTION 7 - HANDLING AND STORAGE

Safe Handling procedures

Wear chemically resistant protective equipment during handling. Use only in well-ventilated areas. Avoid contact with skin, eyes and clothing. Do not breathe vapours/dust. Keep away from heat and flame. Avoid contact with incompatible materials. Use caution when opening cap. Keep containers tightly closed when not in use. Wash thoroughly after handling. Avoid dust cloud formation. *For use as a pesticide, first look for precautions and person protection measures on the label of the packaging. Otherwise, look for official guidance or policies.

Storage requirements

Store in a cool, dry, well-ventilated area. Storage area should be clearly identified, clear of obstruction and accessible only to trained and authorized personnel. Inspect periodically for damage or leaks. No smoking in the area. Keep away from food, drink and animal feeding stuffs. Storage temperatures not exceeding 25 °C are recommended. Avoid fire or extreme heat.

Incompatible materials

Slightly reactive or incompatible with the following materials: acids and alkalis.

Special packaging materials

Always keep in containers made of the same materials as the supply container.

MATERIAL SAFETY DATA SHEET

Ventilation and engineering measures
Provide sufficient ventilation to keep vapour concentration below the given TLV and/or PEL.

Respiratory protection
Respiratory protection is required if the concentrations exceed the TLV. NIOSH-approved respirators are recommended. Seek advice from respiratory protection specialists.

Skin protection
Impervious gloves must be worn when using this product. Advice should be sought from glove suppliers.

Eye / face protection
Safety glasses with side-shields or chemical splash goggles.

Other protective equipment
Wear resistant clothing and boots. An eyewash station and safety shower should be made available in the immediate working area.

General hygiene considerations
Avoid breathing vapors, fumes or dust. Avoid contact with skin, eyes and clothing. Do not eat, drink, smoke or use cosmetics while working with this product. Upon completion of work, wash hands before eating, drinking, smoking or use of toilet facilities. Remove soiled clothing and wash it thoroughly before reuse. Do not take contaminated clothing home.

MATERIAL SAFETY DATA SHEET

SECTION 10: STABILITY AND REACTIVITY

Stability and reactivity  Stable under the recommended storage and handling conditions prescribed.
Hazardous polymerization  Will not occur.
Conditions to avoid  Keep this product away from heat, sparks, flame, and other sources of ignition (e.g. pilot lights, electric motors, static electricity).
Materials to avoid and incompatibility  Strong acids and alkalis.
Hazardous decomposition products  None known, refer to hazardous combustion products in Section 5.

SECTION 11 - TOXICOLOGICAL INFORMATION

Target organs  Eyes, skin, respiratory system, digestive system, central nervous system.
Routes of exposure  Inhalation: YES  Skin Absorption: NO  Skin & Eyes: YES  Ingestion: YES
Toxicological data  No additional information.

</table>

For the product as a whole:
LD50, oral, rat: > 2000 mg/kg
LD50, dermal, rat: > 2000 mg/kg
LC50, inhalation, rat: > 5.0 mg/L/4 h

Carcinogenic status  No components are listed as carcinogens by ACGIH, IARC, OSHA or NTP.
Reproductive effects  Not expected to have other reproductive effects.
Teratogenicity  Not expected to be a teratogen.
Mutagenicity  Not expected to be mutagenic in humans.
Epidemiology  Not available.
Sensitization to material  May cause sensitization of susceptible persons. Test results are mixed. The Buehler test and the Local Lymph Node Assay (LLNA) gave negative results. The Magnusen-Kligman test was positive.
Synergistic materials  Not available.
Irritancy  Severely irritating to eyes. Mild to moderate skin irritant.
Other important hazards  None known.
Conditions aggravated by overexposure  Pre-existing skin, eye, respiratory and central nervous system disorders.

Fenoxaprop-P-ethyl is rapidly absorbed after oral intake, but only to a limited extent (approximately 40%). It is widely distributed in the body, with the highest concentrations found in the liver, kidneys, blood and fatty tissues. It is extensively metabolized and rapidly excreted. There is no indication of accumulation.
SECTION 12 - ECOLOGICAL INFORMATION

Ecotoxicity

The product is toxic to fish, aquatic invertebrates and aquatic plants. It is harmful to earthworms. It is not considered as harmful to birds, soil micro-organisms and insects.

Data for the active ingredient, Fenoxaprop-P-ethyl:

Rainbow trout (*Oncorhynchus mykiss*): 0.31 mg/L (96-h LC50), 0.076 mg/L 21-day NOEC.

Daphnids (*Daphnia magna*): >0.97 mg/L (48-h EC50); 0.16 mg/L 21-day NOEC.

Bobwhite quail (*Colinus virginianus*): >2000 mg/kg LD50.

Mallard duck (*Anas platyrhynchos*): >2000 mg/kg LC50.

Earthworms (*Eisenia fetida*): 24.8 mg/kg soil, 14-day LC50.

Honey bee (*Apis millifera*): >100 µg/bee, contact.

Algae, Cyanobacteria (*Anabaena flos-aquae*): >1.15 mg/L; above solubility limit

Mobility

The active ingredient (fenoxaprop-P-ethyl) has low mobility in soil.

Persistence

The active ingredient, (Fenoxaprop-P-ethyl) is biodegradable, but does not meet the criteria for being readily biodegradable. Degradation half-lives are found to be less than 1 day in aerobic soil.

The solvent Solvesso 200 ND is not mobile in the environment, but is volatile and will evaporate if released into the water or on the surface of soil. It floats and can migrate to the sediment.

Bioaccumulation potential

Due to rapid degradation, the active ingredient, (Fenoxaprop-P-ethyl) does not bioaccumulate.

Solvesso 200 ND has a potential to bioaccumulate if continuous exposure is maintained. Most components can be metabolized by many organisms. BCFs (bioaccumulation factors) estimated at 1200 - 3200.

Other Adverse Environmental effects

This product is an herbicide. The product should not be allowed to enter drains or water courses, or be deposited where it can affect ground or surface waters.

SECTION 13 - DISPOSAL CONSIDERATIONS

Handling for Disposal

Handle waste according to recommendations in Section 7.

Methods of Disposal

Do not contaminate water, foodstuffs, feed or seed by storage or disposal. For disposable containers, triple rinse (or equivalent) containers and add rinse material to disposal tank. Follow any additional local, state or federal requirements for cleaning containers prior to disposal. Make the empty, rinsed container unsuitable for further use by puncturing.

SECTION 15 - REGULATORY INFORMATION

US Federal Information:

OSHA: This material is classified as hazardous under OSHA regulations (29CFR 1910.1200).

SARA TITLE III: Sec. 302, Extremely Hazardous Substances, 40 CFR 355: No Extremely Hazardous Substances are present in this material.

SARA TITLE III: Sec. 311 and 312, MSDS Requirements, 40 CFR 370 Hazard Classes: Immediate (Acute) health hazard. Under SARA Sections 311 and 312, the EPA has established threshold quantities for the reporting of hazardous chemicals. The current thresholds are 500 pounds for the threshold planning quantity (TPQ), whichever is lower, for extremely hazardous substances and 10,000 pounds for all other hazardous chemicals.
